

ABS plastic waterproof box

Plastic waterproof box, junction box, waterproof box

Description: The cover has a fixing screw, with a seal inside

Material: ABS polycarbonate and acrylonitrile-butadiene-styrene copolymer and mixture, is made of polycarbonate and polypropylene alloy thermoplastic plastic, combined with the excellent characteristics of the two materials, mechanical Strong, high impact strength, temperature, anti-ultraviolet (UV) and other properties.

Color: ivory white

Features: impact resistance, heat resistance, low temperature resistance. Chemical resistance and electrical performance. Surface gloss and good features.

Operating temperature: -20 ° to 90 °

Uses: electrical, electronic, communications, fire control equipment, control panel, terminal box, PCB BOX, ship, petrochemical, large factories, coastal factories, unloading wharf equipment, sewage treatment facilities, environmental pollution facilities.

Packing: transparent plastic bag shrink packaging

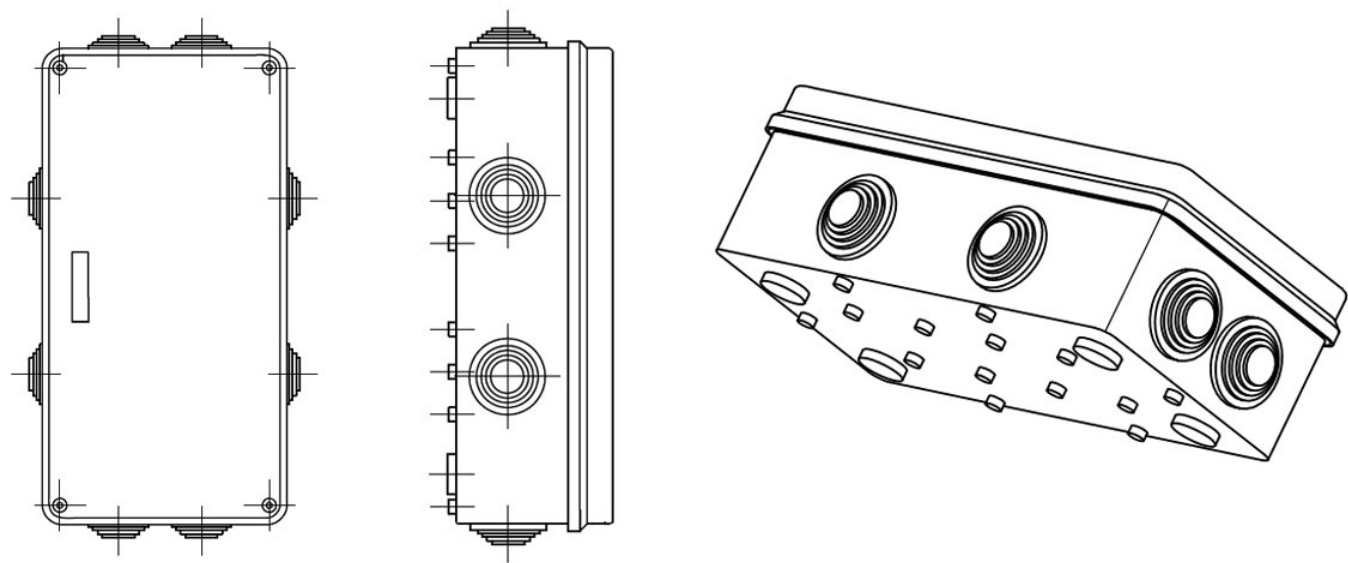

Access hole:

Waterproof box can be used in accordance with the requirements of customers in the above openings, hole location and hole size can be specified in accordance with customer requirements processing, MOQ requirements.

With a rubber plug of the waterproof box, according to the size of the customer cable to cut the rubber plug, the use of very convenient.

ABS plastic waterproof box junction box waterproof box

Specification

model	Number of wiring holes (pcs)	Hole diameter (MM)	Carton size (CM)	Number of packing
50*50 (round)	4	25	46*38*51	300
80*50 (round)	4	25	53*35*62	240
85*85*50	7	25	53*41*53	200
