

Spiral protective sleeve

Spiral protective sleeve

Material: Using modified pp raw materials specially developed by Shanghai Rubber Research Institute

Process: Extrude first and then shape

Shape: spiral

Size: can be customized according to customer requirements

Flame retardant: V0 level, extinguished immediately after leaving the fire source

Color: black, red, yellow, blue, white, other colors can be customized (customized colors require color numbers or samples, and there are order quantities required)

Features: wear resistance, aging resistance, oil resistance, acid and alkali resistance, sun protection, etc.

Application fields: Used in construction machinery such as excavators, loaders, road rollers, forklifts, cranes, and financial machines, as well as forest logging machinery and agricultural machinery.

Uses: Mainly installed on the outside of hydraulic hoses, tubing, cables and other products to protect them from bumps, sun exposure, and corrosion. In various harsh environments, it can protect the internal products, ensure the safety of construction, and extend the service life of the hose and cable.

Spiral protective sleeve
