

P type pipe clamp

P type pipe clamp

Material: steel galvanized

Working temperature: -300 to 900

Product features: sturdy and durable, high and low temperature resistance; convenient fixing construction,

easy installation, and the tube can be closely connected to each other, saving space and cost.

Purpose: Used for fastening and anti-vibration of pipeline systems such as water supply and drainage, heating

and ventilation. A supporting product specially used on C-shaped steel to fix the pipeline on

Above the C-shaped steel bracket, it is avoided that the pipeline on the C-shaped steel bracket is affected

by external forces, causing shaking.

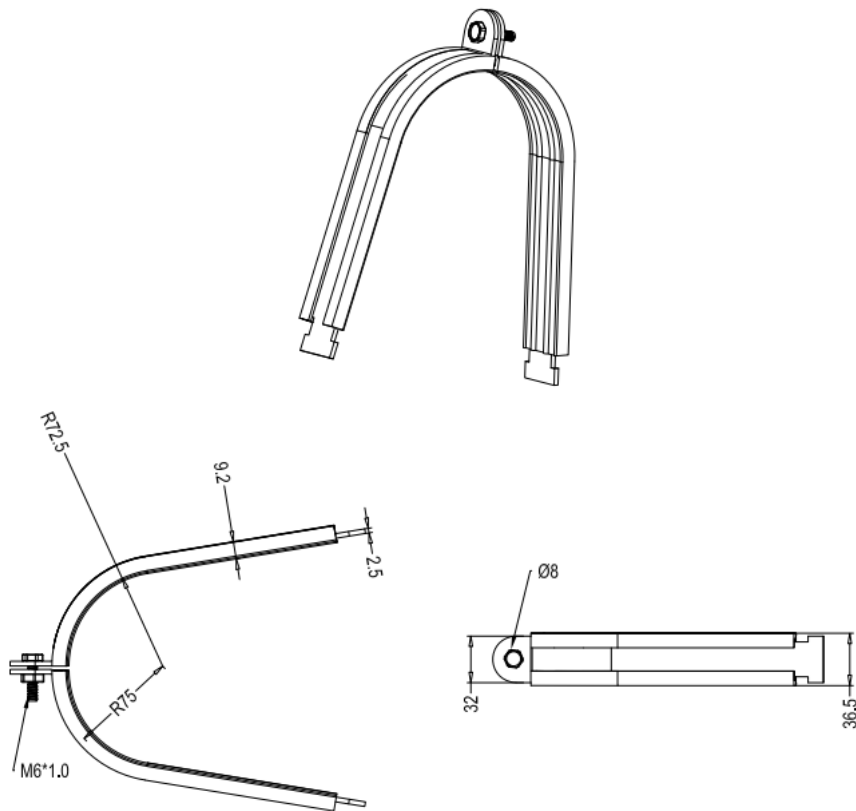

Application areas: It can be used in the automotive industry, rail transit, photovoltaic industry, engineering

construction, electric power, metallurgy and chemical industry, bridge manufacturing and other industries.

P type pipe clamp

Specification

RCCN 日成GKP-150型管卡

product name	Product number	Inside diameter (mm)	thickness (mm)	unit	package
P type pipe clamp	GKP-15	15	1.5	set	1
	GKP-20	20	1.5		
	GKP-25	25	1.8		
	GKP-32	32	1.5		
	GKP-40	40	1.8		
	GKP-50	50	1.8		
	GKP-65	65	1.8		
	GKP-80	80	2		
	GKP-100	100	2
