Cable label tape

Cable label

Material: Imported vinyl material, environmentally friendly and pollution-free

Product features: water and oil resistance, abrasion resistance, moisture resistance, good corrosion and solvent resistance, soft surface material, easy to stick to irregular curved surfaces, and good outdoor durability.

Certification: Pass ROHS, UL certification

Applicable models: GT2000, GT3000, GT3600

Operating temperature: -40℃~+80℃

Recommended use: machine room cabinet, outdoor environment

Cable labels are mainly used to mark wires with thicker diameters, such as twisted-pair wires or larger, by wrapping the protective film mark.

It can cope with the cable layout in different environments, mainly for cables such as twisted-pair cables with thicker diameters, and effectively manage and label power communications and computer room wiring. The transparent covering protective film can effectively protect the content of the label, making the label content effectively readable and free from scratches and corrosion.

Specification
